(54) Title: CREATING VIEWS ON A COMPUTER SCREEN

(57) Abstract: To create a new view on a computer screen (3), the computer receives a request from a user, the request comprising location information such as a point indicated by the user. On the basis of the location information, the computer determines both the location of the new view and its dimensions. The point indicated by the user may constitute the center of the new view, the dimensions being as large as possible considering the size of the screen. A grid of activation points (P) may be displayed on the screen, each point corresponding to a predetermined view size.
